

**Presentation of the multi-scheme terminal compliance
process
v1.0**

The benefits of the FCCS process

FrenchSys Common Compliance Scheme (FCCS)

FrenchSys checks the implementation of terminals or payment acceptance solutions through a common process (FCCS) that integrates compliance processes of the different schemes.

FCCS is a complete multi-scheme **process**:

 It covers the Schemes: **Amex, CB** (including Meal Vouchers), **Discover, JCB, Mastercard, UPI** and **Visa**.

 The process is defined jointly by FrenchSys and the Schemes.

 The validation process of each Scheme is integrated in FCCS.

The FCCS process is based on the integration of the functional and protocol requirements of all Schemes into the FrenchSys specifications to ensure the acceptance and interoperability of terminals in the payment market.

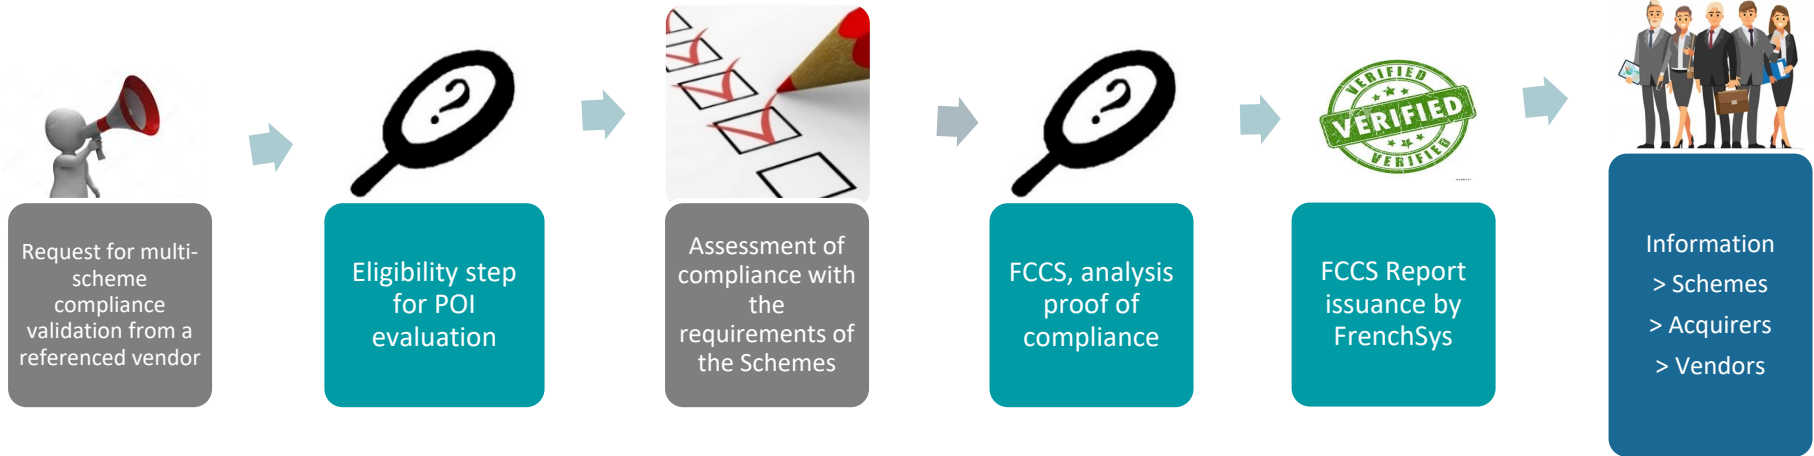

The 3 types of FCCS compliances

FCCS Compliance Types	Definition
Standard Solution - Compliant	Solution compliant with FrenchSys functional and protocol requirements and embeds all schemes
Standard Solution - Partially Compliant	Solution that partially implements certain features and schemes, but with a commitment from the vendor to correct these deviations so that the solution becomes compliant
Non-standard solution - Proprietary	Solution that partially implements certain features and schemes without any commitment from the manufacturer to correct these deviations.

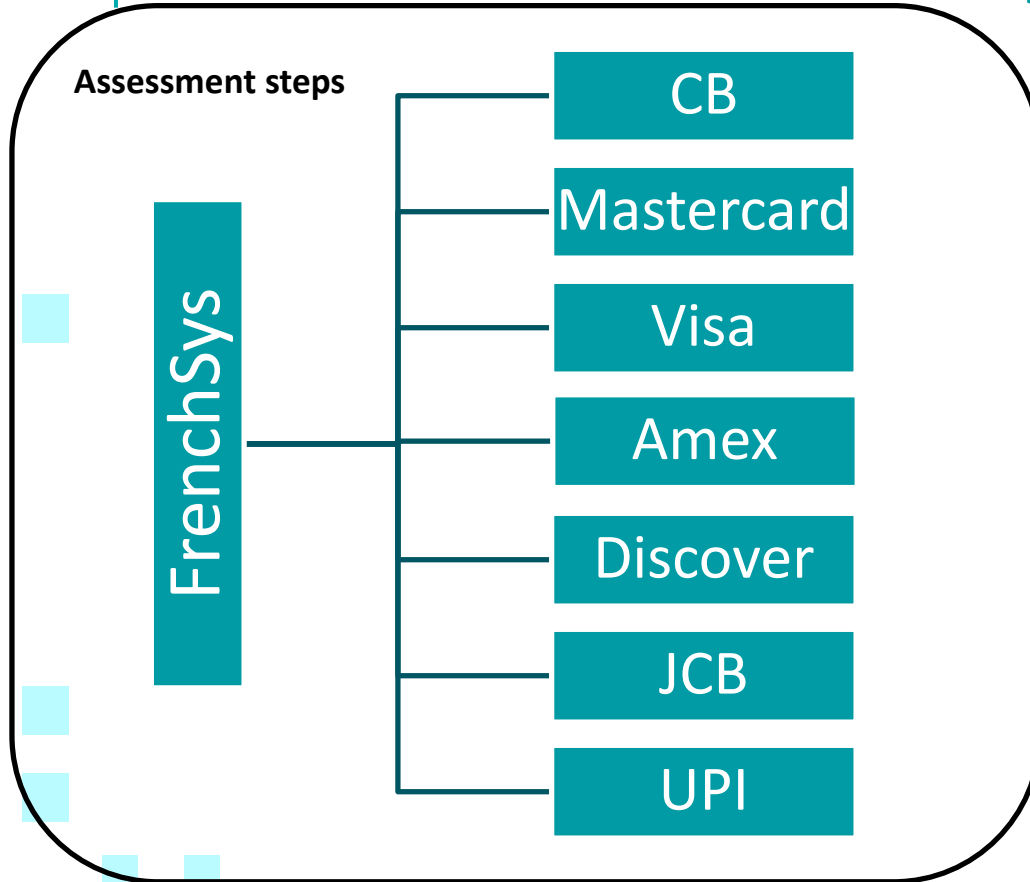

Global overview of the FCCS Process

This process applies to terminal vendors and developers of internet payment solutions.

FCCS Process : Assessment steps

1. Terminal family

- CB, Mastercard, Visa, AMEX and JCB acknowledge the concept of "Family of Terminals".
- UPI verifies by itself if it is a family.
- Discover and JCB : work in progress.
- The definition criteria are specific to each Scheme (with many common points) and reported in the "FCCS Process Guide".

2. Waivers requests are always managed by the Schemes.

3. The conditions for retesting are specific to each Scheme. They are reported in the " FCCS Process Guide ".

SCHEMES

POI Assessment: Step 1

POI Assessment: Step 2

SCHEMES	POI Assessment: Step 1			POI Assessment: Step 2			
	Tests for compliance with specifications and protocols?	Cost of tests supported by	acknowledgement of PayCert certificate by the Scheme?	Scheme tests required?	Cost supported by	Scheme test performed by	Terminal Certification Scheme
CB	Yes	Vendor	Yes	No (if standard solution)	N/A	N/A	CB approval
Mastercard	Yes	Vendor	No	Yes (Modular M-TIP Terminal)	Vendor	ELITT	LOA Terminal
Visa	Yes	Vendor	No	Yes (with Generic Acquirer)	Acquirer	ELITT	No LOA Terminal
AMEX	Yes	Vendor	No	Yes	Vendor	ELITT or Vendor (with AMEX)	LOA Terminal
Discover	Yes	Vendor	No	Yes (in progress)	To be defined	In progress	In progress
JCB	Yes	Vendor	No	Yes (in progress)	To be defined	ELITT	In progress
UPI	Yes	Vendor	No	Yes	Vendor	ELITT	No LOA Terminal

ANNEX

Detail by Scheme: CB

Detail by Scheme: Mastercard

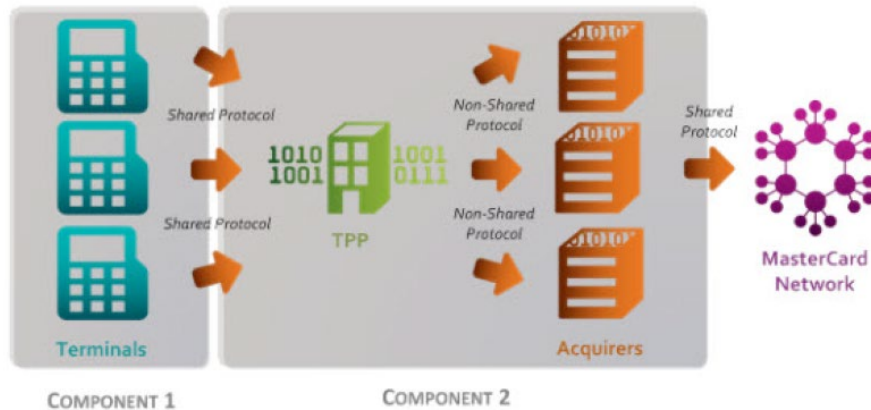

Detail by Scheme: Mastercard Modular M-TIP Process

Common Terminal Acquirer Protocol

⇒ Modular M-TIP applicable

⇒ Terminals can be pre-tested without Acquirer ⇒ FCCS

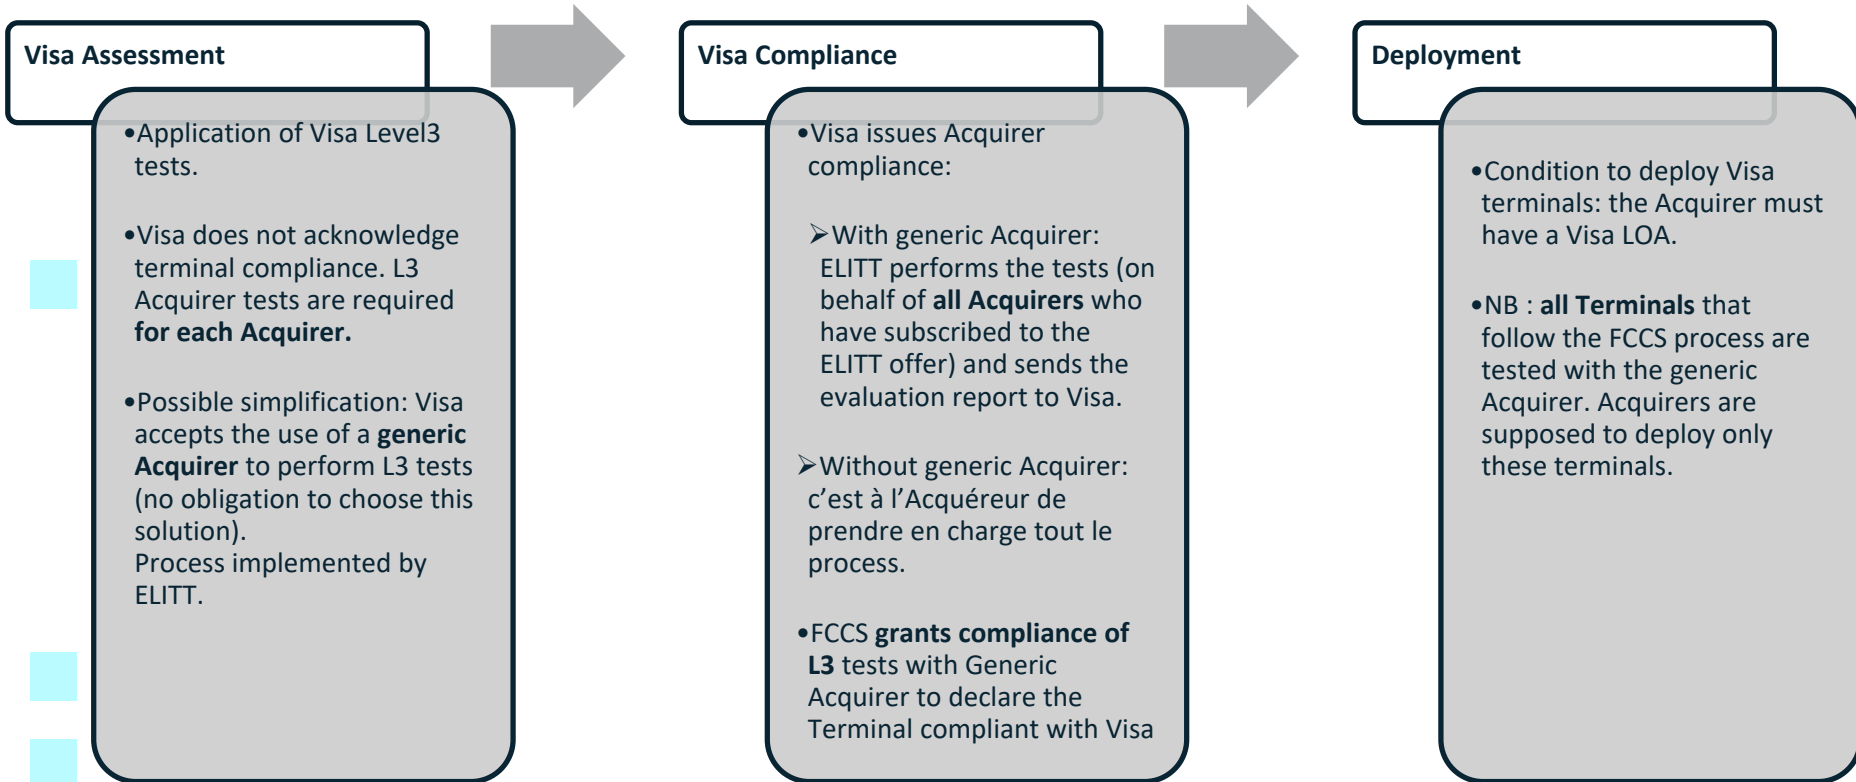

⇒ Acquirer tests are still required but in reduced numbers.

Process Guide”
dernière version

Detail by Scheme: Visa

Detail by Scheme: AMEX

AMEX Assessment

- Application of the AEIPS and Expresspay processes

AMEX Compliance

- AMEX delivers the LOA Terminal
- FCCS **awaits the AMEX LOA** to declare the Terminal compliant with AMEX.

Deployment

- Condition to deploy AMEX terminals: the terminal must have an AMEX LOA.

Detail by Scheme: Discover and JCB

Work in progress with the Schemes

Detail by Scheme: UPI
